- Permit Management
- Groundwater and
Surface Water
Monitoring Programs
- SARA Title III

Leggette, Brashears & Graham, Inc. (LBG) offers environmental permitting and compliance services to meet the regulatory needs of our pipeline clients, at the local, state, and federal levels. Whether the requirement involves the preparation of a plan, permit application/modification, sample collection or other compliance activity, LBG has relevant industry experience.

LBG has experience in the preparation of compliance plans for both construction projects and existing pipeline assets. In addition to preparing spill prevention, storm-water and wetlands mitigation plans, we can assist our clients with the design and construction of upgrades to bring pipeline facilities back into compliance.

LBG can assist clients in obtaining and modifying water and air discharge permits. On request, LBG will manage the logistics of the entire permit compliance process, including communication and scheduling, as well as implementing the required sampling and reporting scope of work.

Serving our clients efficiently, without disruption to operations, and in accordance with our client's operations integrity management systems is a goal LBG has been successful with as demonstrated by our long-term relationships with our pipeline clients.

LBG'S ENVIRONMENTAL PERMITTING AND COMPLIANCE SERVICES FOR THE PIPELINE INDUSTRY

Prepare Spill Prevention Control and Countermeasure (SPCC) Plans
