

EH&S MANAGEMENT PLANS FOR THE OIL & GAS INDUSTRY

Leggette, Brashears & Graham, Inc. (LBG) develops comprehensive environmental health and safety (EH&S) Management Plans that are tailored to the client's operational and organizational structure. LBG evaluates each prospective client's unique goals and objectives prior to establishing an appropriate EH&S policy. Continual support, communication, and follow-through are critical elements to the successful implementation of any EH&S Management Plan. In order for the management plan to be successful, LBG encourages "buy-in" at all levels within the company. Every employee from upper management down to front line staff, and every individual in between, needs to have a clear understanding of their part in this program and an opportunity to express their commitment to the EH&S Management Plan.

KEY COMPONENTS OF LBG'S EH&S MANAGEMENT PLANS INCLUDE:

- Corporate philosophy and mission statements
- Corporate EH&S policies and procedures manual
- Initial baseline and annual refresher training of office and/or field personnel
- Environmental Audits
 - Production properties
 - Third party waste facilities
 - Sensitive environments
 - Properties located in environmentally sensitive areas, e.g. wetlands, public lands, wilderness areas, etc.
